A regional approach to professional learning and development of all teachers in the network

Professional learning is delivered for all schools in this region, providing support to smaller campuses and collegiate relationships between teachers implementing the same approach.

Feedback from teachers and leaders about the professional learning sessions:

- “Another great day of Maths! The hands-on approach is definitely a winner and demonstrating ways to extend and support using the same activity was very worthwhile in our MAG classes.”

Ash Weckert, Principal, Cascade PS

- “Very knowledgeable and the pace of the day was excellent!” **Lynley Neil, Principal, Scaddan PS**

- “I love how easily you can differentiate and extend or support student understanding using this approach.” **Micaela Worth, Teacher, Condingup PS**

A regional approach to professional learning and development of all teachers in the network

Feedback from teachers and leaders about the professional learning sessions:

- “So useful and loved how everything was explained. I studied EC and ended up in 5/6, this was amazing – to see how to use the concrete in an engaging way for older children. Thanks so much.” **Teacher, Mallee region**

- “I felt the pack explained all I needed, but I got so much out of today, how to run and record, language suggestions, differentiation. All my questions, very specific ones, were answered with so much detail. Thank you so much Anna, PL well worth the drive.” **Teacher, Mallee region**

A regional approach to professional learning and development of all teachers in the network

A regional approach to professional learning also provides consistency for students who change from one campus to another, or teachers who change schools within the region.

Teachers who are experienced in the approach assist to train new graduates or teachers moving from Perth to the Mallee/Esperance region.
